Dear DUR researcher, Dear friend,

As a registered EuroDURG member, we kindly invite you to join us in Groningen from August 27 to August 29, 2014, for the next EuroDURG meeting: "Supporting rational drug use for public health and individual patient care".

For further information about this conference and abstract submission, see www.EuroDURG2014.com

The meeting aims to bring European drug utilisation researchers and health policy makers together for an exchange of ideas on how to improve public health and individual patient care by drug utilisation research. We expect to reach about 200 participants. The meeting will bring a selection of educational sessions, workshops and key lectures presented by international expert speakers. The meeting will be organised according to the well known EuroDURG tradition, offering a complete conference (including an attractive social program and also the farewell symposium in honour of Prof Flora Haaijer-Ruskamp directly following the meeting) at the lowest possible price.

We welcome your contribution for this meeting by the submission of abstracts for oral or poster presentation. Abstracts for oral presentation are particularly sought for the following topics:

- Drug utilisation data for adherence research
- Drug utilisation research as a tool for health policy
- Drug use in hospitals
- Comparison of drug use across nations
- Drug use in the elderly
- Drug use in children
Abstracts presented at other conferences during the last year will also be accepted for poster presentation. Please note that the deadline for abstract submission is 28 February 2014.

As a registered EuroDURG member, we hope that you will help us to spread this announcement and to encourage also your colleagues to submit abstracts.

We look forward to welcoming you and your colleagues in Groningen!
With kind regards,

Petra Denig,
for the scientific committee of the EuroDURG2014 meeting

Ria Benko,
secretary of EuroDURG
